**QuickOrder**

QuickOrder

Our innovative QuickOrder system was developed with the high volume school photographer in mind. With a standard barcode scanner and any basic text editing program like notepad, you will be able to enter hundreds of student orders in no time at all. And, because the orders are stored in a text file, it's easy to make changes to any order, or customize text in any package.

AMAZING BENEFITS

» THE HIGH VOLUME SOLUTION FOR DATA ENTRY

» NO MORE MANUAL ORDERING - QUICK AND FOOLPROOF BARCODE-DRIVEN ORDERING SYSTEM

» DOWNLOADABLE PACKAGE/OPTION BARCODE SHEETS - USING YOUR PACKAGE PRESETS

HOW DOES IT WORK?

First, we create proofs which include a unique barcode under every pose. We then create a bar-code "scan sheet", which includes your assigned "presets" or student package and background options for that particular school. You download this "scan sheet" online and print it out on any standard printer. Once the students have made their selections and returned their form, you simply scan their pose, package and background choices and upload this data to your 36Pix account

- KEYBOARD WEDGE OR WIRELESS SCANNER FOR ORDER ENTRY
- PRINT QUICKORDER SHEETS WITH YOUR OWN ARRAY OF PACKAGES AND OPTIONS
- ENHANCED, BARCODED PROOF
- SCAN THE SELECTED POSE
- SCAN PACKAGES, BACKGROUNDS AND OPTIONS

manager. After which, our proprietary workflow system, *Daphne* (**Da**ta **Ph**oto **Ne**twork) will automatically generate an order for our lab to print.

That's it - it's that easy, and it's all done in a fraction of the time it would take to create these orders manually. Once your order has been created in our system, Daphne allows you to track its progress every step of the way.

> " *What used to take us hours of order entry now take us only minutes!* "
